SUMMARY

Software Developer with strong problem-solving skills (150+ DSA problems solved on LeetCode) and hands-on experience across the stack — Java, Spring Boot, Microservices, REST APIs, and React.js. Built SplitSettle, a microservices-based expense-sharing platform with 8 independent services, AI-driven expense parsing, async Kafka communication, and automated debt-settlement logic. Completed a web development internship delivering production APIs for a real-world product. Seeking a Software Developer / SDE role to build and ship impactful products.

TECHNICAL SKILLS

Languages:	Java, JavaScript (ES6+)
Backend:	Spring Boot, Spring Cloud, Spring Security, JWT, REST APIs, Maven, Node.js, Express.js
AI/ML:	Spring AI, Groq API (LLM Integration)
Frontend:	React.js (v19), Tailwind CSS, HTML5, CSS3, Bootstrap 5
Microservices & DevOps:	Spring Cloud Gateway, Eureka, Kafka (Aiven), Docker, Kubernetes, CI/CD, GitHub Actions
Databases:	PostgreSQL (Neon), MongoDB, MySQL
Tools:	Postman, Git, GitHub, Axios, IntelliJ IDEA, Docker Compose, VS Code

INTERNSHIP EXPERIENCE

Web Development Intern | Elite Softwares, Pune

Dec 2024 – Mar 2025

- Built 10+ REST APIs using Python and Django for a Hotel Booking Application, covering room search, booking management, cancellation, and user authentication; designed PostgreSQL database schemas with proper input validation and error handling.
- Deployed the application to production — configured environment variables and domain setup, resolved post-deployment server issues, and tested all endpoints using Postman.

PROJECTS

SplitSettle – Group Expense Sharing & Settlement Platform | [GitHub](#) | [Live Demo](#)

Java, Spring Boot, Spring AI, Groq, Kafka, PostgreSQL, React 19, Tailwind CSS, Docker, Kubernetes, GitHub Actions

- Architected a microservices backend with 8 independent services (User, Group, Expense, Settlement, Notification, AI, Eureka Server, API Gateway), registered with Eureka Service Discovery and routed via Spring Cloud Gateway; containerized using Docker and orchestrated with Kubernetes.
- Built an AI Service using Spring AI integrated with Groq (Mixtral model) to parse natural language expense inputs into structured transaction data, and integrated Apache Kafka (hosted on Aiven) for async inter-service communication.
- Designed a debt-simplification algorithm to calculate minimum settlement transactions across group expenses, backed by PostgreSQL (Neon) with JWT authentication securing all services; set up a GitHub Actions CI/CD pipeline with UptimeRobot for monitoring, deployed on Vercel and Render.

Hotel Booking Platform (Airbnb Clone) | [GitHub](#) | [Live Demo](#)

Java, Spring Boot, Spring Security, PostgreSQL, JWT, React.js, Maven

- Built a full-stack hotel booking application with role-based access for Admin and User; admins manage properties, rooms, and amenities while users search by city, date range, star rating, and price.
- Implemented authentication using Spring Security and JWT with separate Admin and User roles; added server-side date-overlap validation to prevent conflicting room bookings, and developed frontend search filters, price sorting, and booking history.

Voting Management System | [GitHub](#) | [Live Demo](#)

MongoDB, Express.js, React.js, Node.js, JWT, SendGrid, Multer

- Built a full-stack voting platform with Admin and Voter roles; implemented JWT authentication, bcrypt password hashing, email OTP verification via SendGrid, Aadhaar document upload via Multer, and 18+ age validation at signup.
- Admin dashboard supports election creation, candidate management, and real-time vote tracking with automated result declaration; all API routes secured with JWT middleware.

EDUCATION

- Bachelor of Engineering (B.E.) – Computer Engineering** | Alard College of Engineering & Management, Pune (Savitribai Phule Pune University) Graduated: Jun 2026 | CGPA: 6.98/10
- Higher Secondary Certificate (HSC)** – Class XII (Science) | Maharashtra State Board 2021 | 76.17%

CERTIFICATIONS

- Spring Boot Microservices, Apache Kafka, Docker, Kubernetes, CI/CD & Spring AI — [Coding Shuttle](#) Mar-2026
- Java DSA & MERN Stack Web Development — [Apna College](#) | 150+ problems solved (LeetCode)
